# PE456USL

Short-Throw for Small Spaces & Minimal Shadowing

# Reliable laser projector with unique short-throw lens fits in tight spaces and significantly reduces shadows on the screen

## Powerful Performance

- After startup images appear immediately with breakthrough laser technology
- Brightness adjustment maximizes laser life and allows for a consistent looking image over an extended period of time
- High performance video processing/scaling supports 4K/30 content
- Integrated software support for Crestron Roomview, AMX Beacon, PJ Link control systems

**4K UHD**  
READY

## More Flexible Installations

- Short-throw lens allows the projector to be placed closer to the projection surface which saves space and minimizes shadow
- Tilt-free installation capabilities make these projectors ideal for almost any install environment, including portrait orientation

## Advanced Installation Features

### Short Throw Lens

Create a large image from a short distance to save space and minimize shadow.

### Tilt-free

The projector can be rotated freely (360°) to orient the image depending on the installation requirements.

### Portrait mode

Allows the projector to be rotated (and screen if necessary) to a vertical alignment so that portrait content can be viewed without black bars on the side when landscape mode is used.

## MultiPresenter

MultiPresenter is application software that lets you display your device's screen (PC, tablet, smart phone, etc.) on the receiver projectors via wired or wireless LAN. MultiPresenter is free and available on Windows, Mac, iOS, and Android. MultiPresenter can send images from your various devices, which enables you to display real-time images with the internal camera or web pages on the smart devices in combination with a file sharing application.

**MultiPresenter**™

## NaViSet Administrator 2

This software is an all-in-one remote support solution that runs from a central location and provides monitoring, asset management and control functionality for a majority of NEC display devices and Windows computers. It is ideal for multi-device installations over larger infrastructures.

## UNIQUE FEATURES

**Advanced AccuBlend™** ensures detailed images when non-native resolution sources are connected to the projector

**Remote diagnostics** enable the user to monitor and make adjustments to the projector remotely

**Built-in HTTP page** for control and monitoring over a LAN network. Email notification of error messages or lamp end-of-life can be sent to remote locations.

## WARRANTY
