Overview

KEY FEATURES & BENEFITS

First-in-class Replaceable Ink Pack System* – print or copy up to 86,000 mono and 50,000 colour pages without changing the ink¹

High-quality output – brilliant colour accuracy and sharp black text

Fast print speeds – up to 25 ISO ppm (mono), 24 ISO ppm (colour)[†]

More prints, lower printing costs – Epson ink lasts up to 4.3 times longer² than its competition to reduce staff disruptions and lower the overall cost of printing

Productive – auto two-sided print, copy, scan, fax, plus auto media size detection

Easy setup and IT features – seamless network integration, plus security features; PCL³ and PostScript[®] 3 support

Flexible media handling – large-format prints – up to 13" x 19", plus 80-sheet rear feed for specialty media and paper sizes; up to 330 sheets total paper capacity

Built-in networking and wireless performance – includes Ethernet, wireless b/g/n5 and Wi-Fi Direct^{®4}; easily print from tablets and smartphones⁵

*Designed for use exclusively with Epson ink packs

Printer supplied with Initialisation Ink Supply Units only. Yields achieved with replacement pack purchase.

Powerful & professional printers that drive productivity for business & Enterprise

The Epson WF-C878R workgroup printer enables offices to benefit from the increased productivity of a local distributed print fleet that requires minimal intervention, while providing predictable print costs.

Minimise Interventions

Thanks to this printer's super-high-yield ink supply units maintenance is simple. Comparable laser printers will need new toners, sometimes as often as every 12,000 prints. The WorkForce WF-C878R deliver outstanding results with high capacity ink packs lasting up to 86,000 pages for mono, and 50,000 pages for colour.

Also, smaller capacity ink is available that can enable up to 20,000 printed pages in mono and colour. The supply units lead to low intervention and no time-wasting interruptions. Supplies management is made simple, supplies waste is greatly reduced and lower IT support costs are achieved.

Built for business

Heat-free PrecisionCore technology powers the output quality that Epson is known for, at the speeds required for office, commercial and industrial printing. Prints dry fast thanks to the DURABrite Ultra Pro ink. PDL printing emulations, including PCL and Adobe PostScript 3, and Gigabit Ethernet help this printer easily integrate into the business environment. Its Wi-Fi Direct[®] capability also lets you print from supported wireless devices without connecting to a router.

Energy efficient

The WF-C878R uses up to 87 percent less power than competitive colour lasers thanks to its no heat technology. No ozone gas is emitted, and an improved quiet print mode and no fan noise during or after printing make it ideal for the working environment. And there are fewer parts to replace than a laser.

PrecisionCore Inkjet Technology

Introducing heat-free PrecisionCore, the next generation of inkjet printing technology. From professional and industrial-level printers to your desktop inkjet, this groundbreaking technology delivers fast printing with superior quality results. A truly innovative system, PrecisionCore features Epson's advanced thin-film piezoelectric (TFP) elements, which are produced via the MEMS manufacturing process, based on semiconductor micro-fabrication techniques. At the core of this proprietary technology is the PrecisionCore MicroTFP print chip, a digital chip that does not use heat to eject ink and prints at the micron level — 1/100th the size of a human hair. It's this extraordinary focus on accuracy and detail that enables PrecisionCore to deliver revolutionary results, and no heat also means less power consumption, fewer consumables and less intervention, which saves you time and money

High performance, low intervention

Keep your business moving with WorkForce Pro RIPS. Forget frequent time-wasting interruptions to change consumables, deal with supplies mis-management, fix problems or wait for IT support. Just concentrate on smooth, on-demand business printing.

Predictable print costs

Available as part of a Managed Print Service, WorkForce Pro RIPS printers can help to create a distributed printer fleet that both handles the demands of busy workgroups and delivers predictable print costs.

Proximity and security

The benefits of a distributed printer fleet include easy access, confidentiality and control, which all contribute to enhanced workflow. The local distributed print model is particularly useful where confidentiality and fast, direct access to prints is crucial. This includes senior management, legal and HR environments, and customer-facing staff like teachers, doctors, nurses and retail staff who can't leave customers, patients or students while they go off to pick up prints.

Fast print speeds

Heat-free PrecisionCore technology ensures each nozzle on the print head delivers up to 50,000 droplets per second. The result? Fast print speeds that rival those of colour lasers. The WorkForce Pro WF-C878R delivers professional quality, two-sided colour prints at super fast print speeds, making it easy to increase productivity, without compromising quality. Boasting drastically improved print speeds of up to 25 ISO ppm (mono) and 24 ISO ppm[†] (colour), any project can be handled with speed and ease.

Higher colour resolution vs. colour laser printers and versatility

Packing a greater number of nozzles into a smaller surface area, this high-resolution inkjet printhead, along with heat-free PrecisionCore technology, gives you ultra-sharp text, as well as stunning graphics and images — all with smooth gradations on both plain and specialty paper.

Ultra efficient paper handling and versatility

The WorkForce Pro WF-C878R boasts a total of 330 sheet capacity including an **80-page rear tray** for envelopes, labels and specialty media for efficient paper handling.

Extremely durable prints

Heat-free PrecisionCore technology enables the use of advanced ink formulations, **DURABrite® Pro Ultra Ink**. This innovative, pigment based 4 colour ink set, along with heat-free PrecisionCore printing technology delivers smudge, fade and water resistant prints that are highlighter friendly too.

Laser-sharp black and colour text

Delivering perfectly round droplets and extremely accurate dot placement, these remarkable print heads ensure extraordinary output, whatever the application delivering brilliant, ultra-sharp text on plain and specialty papers.

Simple wireless connectivity

Connect to your wireless⁴ network in a snap — even the latest wireless standard, 802.11 n, is supported. No network? No problem. Wi-Fi Direct means no router is required⁶ enabling users to easily connect to wireless networks in seconds, allowing printing from virtually any room in the office.

Wired networking

Built-in Ethernet makes sharing the printer on your network quick and easy.

Productivity anytime, anywhere

Easily print from your tablet or smartphone using Epson Connect™. Supports Android™, Apple® iPad and iPhone, Chromebook™, Kindle Fire™, Mac® and Windows® devices. Wirelessly print documents, photos, emails and web pages whether at the office or on the go. You can also scan documents and save them to the cloud for easy access and collaboration

Print from your iPad or iPhone

Apple® AirPrint™ makes it simple to print emails, photos, web pages and documents straight from your iPad or iPhone. There's no software to download, no drivers to install and no cables to connect. Your Apple device will automatically connect to the printer.

Share your Google® content

Print on the go from a smartphone or tablet using Google Cloud Print™ with your Gmail™ or Google Drive™ account. Plus, print from your Chromebook™ and Google Chrome™ without installing drivers or connecting cables. It's now even easier to share your Google content from anywhere.

Save energy, save paper

The WorkForce Pro WF-C878R includes features such as automatic, two-sided printing whereby users can save up to 50% on paper supply.

† Mono and color print speeds are measured in accordance with ISO/IEC 24734. Actual print times will vary based on system configuration, software, and page complexity. See www.epson.com.au/printspeed for details.

This printer is designed to function only with genuine Epson ink cartridges and not with third party ink cartridges. The printer may not function properly or at all if you use third party ink cartridges.

¹ XL Black ink pack prints up to 86,000 pages. XL Colour Packs print up to 50,000 pages. Actual number of pages will vary. Replacement ink pack yields are based on testing with ISO/IEC 24712 patterns with Epson's methodology in Default mode, printing continuously. Yields may vary considerably for reasons that include images printed, print settings, temperature and humidity. Yields may be lower when printing infrequently or predominantly with one ink colour. All ink colours are used for printing and printer maintenance. For print quality, part of the ink from the included cartridges or ink packs is used for printer startup and a variable amount of ink remains in the ink pack after the "replace ink pack" signal appears. Printer shipped with initial cartridges. Yields achieved with additional purchased ink packs.

² 4.3 times more prints is comparing Epson high-yield inks (86,000 pages black / 50,000 colour) with the 20,000 page yield average of a competitor model in the top 7 highest selling A3 colour MFDs in the 21-30ppm speed segment in the Australian market (Source :IDC November 2019).

³ Not all media types are supported for PCL printing.

⁴ WiFi CERTIFIED™, level of performance subject to the range of the router being used. Wi-Fi Direct may require printer software.

⁵ Most features require an Internet connection to the printer, as well as an Internet and/or email-enabled device. See www.epson.com.au/connect for a list of Epson Connect enabled printers and compatible devices and Apps.

Specification

PRINTER	
TECHNOLOGY	
WorkForce Pro WF-C878R	C11CH60501
PRINTING TECHNOLOGY	Heat Free PrecisionCore 4S printhead 4 Colour inkjet
INK TECHNOLOGY	Replaceable Ink Pack System (RIPS)

This printer is designed to function only with genuine Epson ink cartridges and not with third party ink cartridges. The printer may not function properly or at all if you use third party ink cartridges.

^According to ISO/IEC24711 and 24712 test suite. [Click here for details on ISO testing. \(PDF\)](#)

*Display permanence based on accelerated testing of prints displayed under glass in indoor display conditions; album permanence based on accelerated testing of prints in dark storage conditions. Actual print stability will vary according to media, printed image, display conditions, light intensity, temperature, humidity and atmospheric conditions. Epson does not guarantee the longevity of prints. For maximum print life, display all prints under glass or UV filter or properly store them.

Usage Conditions

Epson products are designed and made to give highly reliable use and long life when used according to its specifications. With any system, product or device used in situations where human life may be involved or at risk, Epson advises that you should take all necessary steps to ensure the suitability of your Epson product for inclusion in your system, and recommends that you include fail-safe procedures and redundancy support or backup equipment in your system, to maintain the maximum safety margin and optimum system reliability. Examples include but are not limited to – do not interfere with any electrical components within the device, do not use items supplied with the product for purposes other than as intended by Epson (ie mains cords, inks, CDs, plastic wrapping) and do not make modifications to the product.

This printer is designed to function only with genuine Epson ink cartridges and not with third party ink cartridges. The printer may not function properly or at all if you use third party ink cartridges.
