MAKEITRACK2   **Our Advanced Rack Server**   **$6,999**
Why Buy this Server

This is for a growing business that requires an expandable fault tolerant rack server for installation in an equipment rack or at a hosting centre.

Customers requiring a rack host for virtual machines should purchase MAKEITVMRACK1.

Customers not requiring advanced server fault tolerance features should consider MAKEITRACK1.

What's Included

This is a 6 core single processor server with 32 GB RAM. An array controller and three 900 GB SAS drives (approx. 1.8tb available) are included. A second (redundant) power supply is also pre-installed.

An additional processor may be added to expand to 12 cores and both RAM and disk may also be expanded.

Windows Server Essentials is included and pre-loaded. This may be upgraded at an additional cost to Windows Server Standard.

An additional processor may be added to expand to 12 cores and disk storage may also be expanded.

The server includes 3 years on-site warranty with next business day response in metropolitan areas.

6 Core Processor   32GB Memory   3 x 900GB Disks

Other things you might want

WINDOWS SERVER STANDARD 2012	ADDITIONAL SQL LICENSES
If the software requiring SQL is not supported on Windows Essentials you will probably require Windows Server 2012 Standard Edition. This is a more expensive version of Windows Server 2012 and requires each user to be licensed separately.	You might have a requirement for Microsoft SQL server. We sell this as the server with 2 licenses and offer additional licenses separately to be purchased and added to your Microsoft license agreement.
EXTENDED WARRANTY	**BACKUP**
An upgrade from the three years onsite next business day warranty to a 3 year onsite 24 by 7 by 4 hour warranty is available. Please contact us to discuss your requirements.	Windows Server includes basic software to back up your server to external hard disks. We sell three 2tb external drives with setup of the backup job and an initial backup of your new server performed.
SERVER ANTI-VIRUS and ANTI-MALWARE	**MICROSOFT OFFICE AND EXCHANGE ONLINE**
We are also able to provide server anti-malware and antivirus which also covers other devices including PCs and tablets. Our fee includes the license and loading the software onto the server.	For an additional fee including software subscription and installation, we can include Office 365 Business Premium providing Outlook email with Exchange Online, Word, Excel, PowerPoint and more for a specified number of users. There is an annual payment for the software subscription.
