

- 4 Core Processor
- 32GB Memory
- Dual 2TB Disks

Why Buy this Server

This is for a small business that is relying on an accounting or other program that requires SQL database to be installed. The SQL database is installed on Windows Server Essentials but many of these accounting and other programs may require Windows Server Standard.

What's Included

This is a 4 core single processor server with 32gb RAM and dual 2TB drives. We build the server in our configuration centre and pre-install Windows Essentials (with support for up to 25 users) and SQL Server with 2 users. Additional SQL Server licenses may be purchased separately if required.

The server also includes a keyboard and mouse and monitor. The server includes 1 year on-site warranty with next business day response in metropolitan areas.

Some things that aren't included

You will still need to create your users and setup the login from each workstation. You will probably want to load additional programs to the server.

Other things you might want

<p>WINDOWS SERVER STANDARD 2012</p>  <p>If the software requiring SQL is not supported on Windows Essentials you will probably require Windows Server 2012 Standard Edition. This is a more expensive version of Windows Server 2012 and requires each user to be licensed separately.</p>	<p>ADDITIONAL SQL LICENSES</p>  <p>You might have more than 2 users requiring SQL Server. We offer additional licenses to be purchased and added to your Microsoft license agreement.</p>
<p>BACKUP</p>  <p>Windows Server includes basic software to back up your server to external hard disks. We sell three 2tb external drives with setup of the backup job and an initial backup of your new server performed.</p>	<p>EXTENDED WARRANTY</p>  <p>An upgrade from the three years onsite next business day warranty to a 3 year onsite 24 by 7 by 4 hour warranty is available.</p> <p>Please contact us to discuss your requirements.</p>
<p>SERVER ANTI-VIRUS and ANTI-MALWARE</p>  <p>We are also able to provide server anti-malware and antivirus which also covers other devices including PCs and tablets. Our fee includes the license and loading the software onto the server.</p>	<p>MICROSOFT OFFICE AND EXCHANGE ONLINE</p>  <p>For an additional fee including software subscription and installation, we can include Office 365 Business Premium providing Outlook email with Exchange Online, Word, Excel, PowerPoint and more for a specified number of users. There is an annual payment for the software subscription.</p>
<p>OTHER STUFF</p> <p>Ask us about workstations, printers, scanners, projectors and screens, routers and backup. We're here to help. Call 1300 00 1000 now!</p>
