

# SG Audio Visual Ai Series Intelligent Commercial Grade Electric Passport Screen

## Suitability

The latest Ai Series Passport Screen incorporates intelligent control. It is designed for ceiling or wall mount and used for identification photos. It is a 1.2m wide screen which is 3m long. These screens are available in matt white or grey without borders. Other sizes are available by special order.

These screens suit government offices, personnel departments, security desks and more.

## Features

All Ai Series Passport screens use high quality Matte White or Grey screen surfaces and quiet tube motors producing a flatter screen surface and quiet, reliable operation.

The white surface is used for passport and visa applications. The grey screen provides higher contrast and is used for identification and security cards.

The Ai Series passport screens may be operated via remote control or from a wireless wall switch. These are included with the screen.

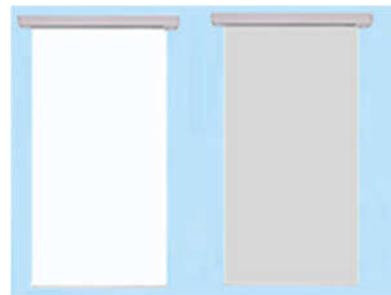

## Warranty, Options and Spares

1 year warranty against defects in materials & workmanship. An extended 3 year warranty is available separately.

Spare parts are maintained in our Australian warehouse.

A number of mounting and control options are also available.
