SGETW260   117" 16:9 format ET Series Electric Projector Screen (2.6m * 1.46m) with white black backed flexible fabric

ET Premium Ceiling Recessed Screens

SG Audio Visual ET Series intelligent projection screens are commercial grade side-tensioned electric screens. There are models with either an ALR grey surface, CLR surface, rear projection or flexible white surface. The side tensioning system keeps the screen surface flat and provides for even retraction of the surface into the housing.

The ET series also features an aluminium alloy housing, intelligent control system and premium tube motor. The system is supplied with remote control, wireless wall-switch and power cable and supports wi-fi control via a mobile phone app.

Projection Surface

The flexible white Surface is designed to provide a flat image in rooms with controllable light levels. Will work with standard, short throw and ultra-short throw projectors. The surface has a 1.1 gain and a wide 165 degree viewing angle.

The surface is held flat by the adjustable screen tensioning system.

The surface is based upon a multi-layer PET fabric with a black backing.

Screen Dimensions

This 117" ET Series 16:9 format screen has a 2.6m wide white flexible surface with an overall drop of up to 1.94m including the 50cm black leader. The white flexible surface is recommended where light can be controlled in the room and should be matched with a brighter 16:9 projector.

After allowing for the 6.5cm black border the image size supported is approximately 2.44m * 1.37m. The slimline housing is only 13.5cms wide including the flange and 10.9cms high and the screen has an overall length of 2.8m.

We would normally recommend this screen for a medium sized home cinema room at least 3.5m wide and 4.5m deep.

Intelligent Control System

Wireless Wall Switch and Remote Control
Each ET Series screen ships with both a wireless remote control and a wireless wall switch. The wireless wall switch provides easy installation of a switch to control the projector screen without the need for additional cabling.

Wi-Fi control

The intelligent control system also supports wireless IP control via the Smart Life app and a phone or tablet with additional voice control support via most smart speakers including Google Nest and Alexa.

Other Control Options
Standard control is via RF remote control and RF wall switch or Wi-Fi. Optional control components include IR remote control, 5V low voltage wired switches and 12V cables and connectors for serial (RS485) connection to control systems, PCs and projectors (via trigger port).

Housing and Mounting Brackets	
	The ET Series features a slimline white Aluminium alloy housing with a curved front face The side-tensioning system is retracted within the housing so that only part of the weight bar is visible.
	The ET series floating mount system allows the L Shaped brackets to be positioned at any point along the rear/top of the housing providing a highly flexible mounting solution.

Warranty

This product comes with a two-year manufacturer's warranty.
