SGWAW220UST      100" WA Series 16:9 format  
Thin-Bezel CLR Fixed Frame Screen for Ultra-short  
Projectors

#### **WA Series Thin Bezel Fixed Frame Wall mounted Screens**

SG Audio Visual WA Series thin bezel wall-mount fixed frame projection screens are commercial grade screens with specialised ALR and CLR fabrics for rooms with moderate ambient light.

They feature a tiny 1cm black border and easy mounting system and a native 16:9 video format.

## Screen Dimensions

This 100" WA Series 16:9 format screen has a 2.2m wide grey CLR surface specifically designed for use with an ultra-short projector where there is significant ambient light in the room.

The CLR fabric is based upon a multi-layer PET fabric with a directional reflective coating.

The WA series feature a tiny 1cm matte black aluminium frame. After allowing for this 1cm black frame the image size supported is approximately 2.18m \* 1.23m.

We would normally recommend this screen for a small, brighter home cinema room at least 2.5m wide and 3m deep.

This model is not suitable for standard or long-throw projectors.
