

VIVIDSTORM S PRO Electric Tension Floor screen

The Best Choice for Ultra-short Throw Laser projector-S PRO Electric Tension Floor screen

The screen with special optical sawtooth structure and the light-rejecting filter to give a stunning performance in ambient light, Especially the bright light from above the projector screen. Images are reproduced without the hot-spotting of other screens that rely on high gain to overcome ambient light. Adaption Ultrashort throw laser projector.

The UST Laser projector projects a picture from the bottom. because the ultra-short focus ambient light rejecting screen material use a special optical serrated structure and a light suppression fitter. The picture projected by the projector projects directly onto the special light plate. Reflected in the eyes of the viewer, this screen is more manipulative than the ordinary diffuse screen accurate control of the projector.

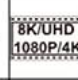

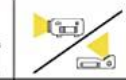

Also, it has no light reflection. Unlike the traditional projection screen, UST ALR material is able to present the image under bright light. It has removed foggy phenomenon, with a nearly perfect viewing cone of 170 degrees, our UST ALR material is capable of being viewed from extreme off-axis positions.

Even if you have watched for a long time, your eyes will not feel tired. This makes it perfect for commercial environments, large living and family rooms, and everything in between.

Roll-up screens come in a variety of designs and a floor standing projector screen is often the best pull up projector screen option. A free-standing projector screen is an ideal solution when wall or ceiling installations are impractical for the common roll up projector screen. The screen has a high-density hard-core military design, which requires no punching and installation. Connect to the power cord for quick use. The S PRO Electric Tab-tensioned Floor Screen is the best ideal solution for this demand.

The screen material uses the Ultrashort throw Ambient Light Rejecting screen material. It is the perfect match for Ultra short throw Laser projectors.

Perfect for home theater indoor projection screen watch your favorite movies with high-quality electric projector screen.

The Screen can block light from above the screen

The Screen cannot block the light from the left, right, and in front of the screen.

We really care about your choice is right for your UST laser projector
Why the UST ALR screen material can not use for the normal projector?

Overhead placement or a standard projector will make the image very dark, on account of the screen's absorbent layer deflecting the light that is not aligned with its reflective angle. The screen material is not suitable for Standard throw, Short throw projector, and Long focus throw projector, it will show on the "Rainbow eye" on the screen material.

The most convenient screens are suitable for almost every situation-perfect for home theaters,business and class rooms. Beside,it can also bring you a perfect viewing experience.

Luxurious Relaxation-Your Perfect Entertainment Companion

- *The manual switch control system*

The manual switch can simply control the screen.

After the screen rises, you can unplug the power plug or turn off the manual button switch without power, because the viewing time is long, and the screen does not require additional power to support the screen rises.

- *Four fixed bottom bracket*

To prevent the screen from falling, we offer the

Four fixed bottom bracket under the screens.

Rotate the four bottom brackets and select one of the brackets depending on the situation.

The accessories also offer the screws to fixed it on the ground.

The Wall Bracket

**This accessory requires
additional purchase**

- *The Wall bracket (need purchase additional)*
Considering that the screen may not be able to meet the place where it cannot be placed on the ground.

we provide an additional sturdy aluminum alloy wall hanging rack that can be purchased for simple wall installation.

About the screen feature

- *Adjusting the screen height limits*

Screen height is adjustable by inserting the Rod(accessory) into the Limit switch adjustment hole to turn clockwise or anticlockwise to set the height of the risen screen.

- *Wireless Projector Trigger Control (Gift)*

Our plug and play 12V wireless projector trigger operates the screen Up and Down when turning, your projector On/Off synchronously.
