MORE POWER, BETTER PERFORMANCE, HIGHER PRODUCTIVITY

Productivity. The HD Ultra X series is the epitome of productivity. It doesn't require warm-up time, it's super-fast, it detects your paper size instantly, and it transfers data onto your screen faster than any other large format scanner on the market.

Quality. With its CCD technology, HD Ultra X matches the color of your originals like no other. You get crystal-clear scans with an unequalled sharpness. Add our Nextimage 5 software, and you can clean-up your high-quality scans and improve the look of your originals.

Flexibility. The HD Ultra X series just makes life easier. Load originals where you want and adjust the thickness capacity up to 15 mm to capture artwork, blueprints, photography, maps, and more. It's everything you need, all from one machine.

Workflow. This series has three solutions to choose from: the stand-alone solution, the Nextimage Remote solution or the ScanStation Pro solution. Whatever you need we have the fit for you.

High-quality lenses

Contex CCD scanners use premium Fujifilm lenses to bring you high-resolution images in the best quality available on the market today.

Instant-ON feature

Save valuable time with the ability to start scanning without warm-up time.

True size detection

HD Ultra X finds the paper width automatically as it scans.

OTAC (Optimal thickness adjustment control)

Quickly and easily adjust the scanner to the thickness of any original.

Speed adjustment

Three different speed levels on the touch panel makes it easy to adapt the scanner to your workflow and the requirements of the original.
