A3F2400N / A3F1200N High Speed Flatbed Scanners

Professional 48-Bit Color Depth

True 48-bit color scanning produces much smoother and more detailed color gradient and color variations which deliver vivid images with true-to-life color.

Optimal 48-bit color   24-bit color

High Quality Image Processing

This scanner includes the professional image processing software which can enhance different image themes such as portrait, landscape, animals/plants, picture albums and etc.

Convenient Batch Scanning

Batch scanning is an easy way to multi-scan any part of your document using a variety of scan settings, which can help save time and work more efficiently.

Descreen

Descreen helps to remove moiré patterns from printed material, such as magazines, newspapers, or other item that contains images with patterns or dots.

Color Matching Control

Color Matching helps to adjust the color, and to minimize the color difference between the original and scanned image, so it more accurately reflects the actual colors of the original image.

Photo Refresh

This function is able to restore pictures with faded colors, which can make your old faded pictures bright, vibrant and like new again.
